*Reasons for Allowance*

The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art does not disclose a method for conditioning honey bees to search for a target odor comprising the specific series of steps—including those of applying the target odor to at least one hive and placing at least one feeding and conditioning means in the form of food and the target odor near the at least one hive—set forth in claim 1. A prior art reference discloses a system of harvesting honey wherein bee colonies are introduced in a preselected pattern amid perennially flowering plants that themselves have been oriented in a systematic pattern; no application of a target odor to at least one hive or the alteration of bee feeding periods with bee “starvation” periods to encourage the bees to forage and identify the target odor—as recited in instant claim 1—is disclosed.

The prior art also does not disclose a means for feeding and conditioning bees including a base whose upper surface has both a well for food and a channel separate from the well, a screen covering the upper surface of the base, and a ring disposed above the screen and removably attached to the base. Prior art patents depict animal food bowls having central containers surrounded by channels or “moats” but no screen coverings and overlying rings.

Any comments considered necessary by applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Applicants should note that the non-patent literature document from vol. 166 of the AAAS Annual Meeting of the American Association for the Advancement of Science was not considered due to its absence from the application file.
